

EDF RENEWABLES TRADES & CLEAN ENERGY SCHOLARSHIP

Recognizing the build out of renewable energy projects across New York State in the coming years, EDF Renewables seeks to award a \$2,000 scholarship to a student who intends to apply for a post secondary program that either: a) incorporates one of the trades that is needed for the build out of renewable energy projects., or b) a program that includes a renewable energy component.

Students do not have to be attending a 2 or 4 year institution. A training program for a trade would also qualify for these funds. Preference is to support a student who is in financial need, and selection would be determined by the high school counselor. Types of trades that get involved in solar energy projects include but are not limited to: electrician, laborer, carpenter, operating engineer, etc.

Application available in the guidance office.

Application deadline: May 31, 2023
